Name of the student: Md Adnan Qamar

Team Horizon

Team Leader / 1st Member : Md. Adnan Qamar

2nd Member : Aditya Anand

3rd Member : Utkarsh Pratap Singh

4th Member : Himanshu Priydarshi

College Name: Rajasthan Institute of Engineering and Technology

Location: Delhi

Program (Data Analytics) : Decoding Data: Insights & Impact through Analytics 2025-26

Partner Name: IBM SkillsBuild

From Curiosity to Career Readiness – My Journey with Data Analytics through IBM SkillsBuild

As a Computer Science and Engineering student at the Rajasthan Institute of Engineering and Technology, I recognized that standing out in today's competitive market required skills beyond core academics. A growing interest in data-driven decision-making led me to enroll in the IBM SkillsBuild Data Analytics program to gain a practical edge.

The IBM SkillsBuild Data Analytics program significantly advanced my proficiency in Excel, SQL, and Python, encompassing a comprehensive understanding of data collection, cleaning, visualization, and interpretation. Through this program, I gained practical experience in automating data processing using Python, which honed my problem-solving and analytical capabilities.

Developed an end-to-end COVID-19 data analysis solution for a team project, including data cleaning, validation, and automated visualizations (bar chart: deaths per million by continent; line chart: smoothed new cases in Europe vs. Asia). This enhanced my technical skills and confidence in real-world analytics.
